DETAILED ACTION

This action is in response to After Final Amendment filed May 22, 2006. Applicant's 37 CFR 1.132 Affidavit has been considered.

Response to Arguments

Applicant's arguments, see 37 CFR 1.132 Affidavit, filed May 22, 2006, with respect to claims 1 and 10 have been fully considered and are persuasive. The rejection of claims 1 and 10 has been withdrawn.

Applicant filed a 1.132 affidavit stating the claimed distance of about one beam diameter between the last flat fold mirror and the exit pupil of the sub-aperture telescopes and the about three to four beam diameters of the prior art cannot be considered to overlap based on the broadest reasonable interpretation of one of ordinary skill in the art. Applicant states that the prior art could not perform the fill factor and field of view the current invention has based on the difference in the distance between the last flat fold mirror and the exit pupil.

Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2872

Regarding claims 1 and 10, the prior art of record fails to teach or suggest a plurality of sub-aperture telescopes, each including four powered mirrors and a plurality of sets of relay optics each set of relay optics including a first flat fold mirror, a trombone mirror pair and a last flat fold mirror where the last flat fold mirrors are disposed within about a beam diameter of the respective exit pupils from the exit pupils of the sub-aperture telescopes and a combiner section.

The remaining claims depend from claim 1 and are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
